reason the Milwaukee hoy is classed as a title seeker and he has a good right to make a claim for the championship.

Jimmy Gardner, Mike (Twin) Sullivan and Harry Lewis are the three boys who now lay claim to the welterweight championship. And it is up to Clabby to clear up the situation a bit. He has already fought a draw with Gardner and efforts are now being made to match him with Mike Sullivan. A New York and a Boston club are after the mill and it will probably be closed so the two can clash early in March.

Clabby has a wonderful record for a lad who might be considered new in the game. For a time was a sparring pariner for Battling Nelson, but the exhibition didn't make much of a hit because Clabby was far too cleves u bover for the new Hentweight champion. A peep in the "dope" book shows that Clabby has fought several good men and made good.

Chemnal Regs, is authority for the terrific swat of Orth's at a fanning bee in Cincinnti.

There's a boy that sould sting 'em hard, even if he was a pitcher,' said Clark. "My statement that Al once hit the ball too hard to do any good may sound silly, but it is true nevertheless. It was like this:

"We were playing the Detroit Tigers on our own lot. In the ninth inning we came to vat with the Jennings aggregation one run ahead of us. The first man up was thrown out at first. Schmidt caught a foul fly from the next man's bat. The third man to face the Tiger pitcher was a fairly good batter, but I was desperate and decided to use Al in this pinch. I told him to get to the plate. I figured that he could possibly the the score with a home run or at least get on base.

The first ball that was passed up to him cansed Al to whale away. He caught it square on the nose and the way it started out was beautiful to see. It sailed between Sam Crawford and Ty Cobb toward the center field fence. It hit the boards on the first policy.

way it sailed between Sam Crawford and Ty Cobb toward the center field fence. It hit the boards on the first bound and started back just about as fast as it had started out. Crawford grabbed it after it had returned about 100 feet from the fence, and by lightning quick relays the ball got to the plate just in time to nip Orth, who was making a magnificent slide.

"If Al hadn't hit that ball quite so hard Crawford would have played the hit differently, it wouldn't have bounded so far back and Orth would have gotten home easily. As it was, that long hit of Orth's marked our Nemesis for that day."

Frank Bancroft had been paying close attention to the narrative and he immediately launched forth in this manner:

"The reminds we of a little affect.

THE ALVEOLAR METHOD

What It Does For Toothless People

By means of the wonderful Afveolar Method we are able to give back to a patient the full set of teeth he or she started in with in the beginning. All we require is two or more teeth in each jaw to work from, and we shall not resort to plates or ordinary bridgework in the process of the work. Your mouth will be free from incumbrances.

Before we accomplish this result we put the gums and the natural teeth in a healthy condition, tightening the teeth which may be loose and curing pyorrhea if the patient is afflicted with that dreadful disease.

All of the teeth we supply are practical teeth; each set in its own socket following nature's plan, so that the strain is equally divided. One is able to bite on these teeth and use them in exactly the same manner as he would his natural teeth. They match nature's teeth so closely as to deceive experts. They are beautiful to look at and a source of tenstant delight to the one who wears them.

A PAINLESS PROCESS

An impression has gone forth that there is some surgical operation connected with the Alvesiar method of restoring missing teeth. Some people have written in to know if we have down into the hone and put the teeth Others have an idea we set the new teeth into the sockets where the Others have an idea we set the new teeth into the sockets where the natural teeth were originally.

It is quite natural that some unthinking people would ask such questions, and in order that they may be fully answered we will state that there is no boring, no cutting, no implantation about the Alveelar Method, nothing about the work that is painful while it is being done or after-

ward.

Patients leave the office with the Alveolar teeth in place and at once begin chewing meat, eating candy, toast, or anything else with the same comfort they would enjoy if every tooth in their head had grown there.

If we couldn't promise this and make good on the promise, the Alveolar Method would not be a success. It would be no better than ordinary bridgework or partial plates.

WE ARE GENERAL PRACTITIONERS All Forms of Dentistry Treated by Experts.

While the Aiveolar Method is our great specialty, we are general dental practitioners as well. From the simpest filling to the most intricate piece of porcelain work, our experts are at the service of the public.

Naturally we would do such work well, much better than it could be done in a one-man office, for the operators employed here are all men of the very highest skill. They need to be to do the Aiveolar work. Bungliers would not be tolerated in our office for a day, neither would dental students. We demand the finished craftsman, both at the operating chair

What's the Use

of throwing away Good money on a worthless stove?

Hundreds of dollars are spent - actually thrown away - each year by people who make this common mistake.

Of course every stove will stand a reasonable amount of repairing, but there comes a time when even the "Doctors" can't

It's then you should make your way to

DADCTOW'C

where you can inspect the largest and best line of these goods to be had in the city. They charge you nothing for their sixtythree years of experience with stoves - but it is worth something to YOU, isn't it?
